1 INTRODUCTION

In this component C7.2.1, existing documentation in regard to the OpenUp! project has been identified, listed and categorised according to the thematic chart developed in C7.1.1 *Key staff for the Helpdesk Network identified*¹.

This component consists of two parts: an explanatory text and a list of 273 identified documentations in the annex. The text will elaborate on the methodology used to categorise the documentation, give some background information about the most important sources of the documentation, and provide an analysis of the documents.

2 METHODOLOGY

Documentation was searched for according to the subjects and themes set up originally in C7.1.1. There are three main themes: (1) Networks/Projects, (2) Technical Questions, and (3) Copyright and IPR questions with several subcategories. The categories are also used for the OpenUp! Helpdesk Forums² and are adapted according to the questions that arise within the OpenUp! project. In the annex the themes are shown in the column Category.

We established a set of required metadata. For C7.2.1 the following columns will be used:

1. **Title**: Title as it is stated in the resource itself.
2. **Author(s)**: Name of the author(s). If no author is given then it says “Anonymous”.
3. **Institution(s)**: Name of the institution. If no institution is given it says “Unknown or N.A.”
4. **Project(s)/Network(s)**: Name of the project in which this resource was produced in. If no project/network is given it says “Unknown or N.A.”
5. **Funding body**: Name of the funding resource. If no funding body is given it says “Unknown or N.A.”
6. **Description**: A short introduction to the main topic that is covered in the resource. Descriptions taken from the original document are marked by citation marks and a disclaimer [taken from the document].
7. **Date**: Date of the publication according to the metadata, if applicable.
8. **Version**: Version number as given in the document or as document metadata.
9. **Access date**: The date when a given resource was last accessed via the URL given in the list.

¹ Full text at: http://open-up.eu/sites/open-up.eu/files/u2/C711_Key_staff_helpdesk_Final%20Version_Updated.pdf

² See the categorisations in the OpenUp! Forums at <http://open-up.cybertaxonomy.africamuseum.be/forum>

10. **Category:** The categories are based on the Themes/Aspects presented in C7.1.1, where three themes were introduced to sort the different questions: (1) Projects; (2) Technical Questions; and (3) Copyright and IPR Questions.
11. **Language:** Language of the documentation it is written in.
12. **Type:** Media type of publication, like HTML publications as well as PDF and Video, etc.
13. **Pages:** Number of pages of a resource, if applicable.
14. **URL:** Link to the electronic resource, if applicable.

3 DOCUMENTATION SOURCES

Most of the documentation mentioned in this component has been selected from the websites of TDWG, GBIF, BioCAsE and Europeana. However, a lot of interesting documentation could also be found on websites of past or ongoing projects in the biodiversity information and digital library domain, like BHL-Europe and STERNA, or from institutions and networks like CETAF and ICOM, and not to forget, documentation produced within the OpenUp! project itself. The documentation sources used to identify the selected documentation are listed in alphabetical order.

3.1 BHL-Europe

The Biodiversity Heritage Library for Europe (BHL-Europe) is a project that makes Europe's biodiversity literature available to Europeana. Documents produced in the project are accessible under <http://www.bhl-europe.eu/en/outcomes>, presentations are available at <http://www.bhl-europe.eu/en/outcomes/presentations>, and the newsletters at: <http://www.bhl-europe.eu/en/newsletter> and <http://www.bhl-europe.eu/en/newsletter/archive>.

3.2 BioCAsE

The Biodiversity Collection Access Service (BioCAsE) refers to a former European project BioCAsE - Biological Collection Access Service for Europe), a suite of related open source XML web services for publishing biodiversity information, and the GBIF Participant Node for CETAF (Consortium of European Taxonomic Facilities). The BioCAsE provider software is at the heart of the technical infrastructure of OpenUp!.

The reference technical documentation on the BioCAsE provider tool is located at four places: (1) the BioCAsE tools, among them the provider: <http://www.biocase.org/>, (2) the latest releases of the BioCAsE tools http://www.biocase.org/products/provider_software/, (3) ABCD as a query protocol: <http://www.biocase.org/products/protocols/>, and (4) the PyWrapper Wiki: http://wiki.bgbm.org/bps/index.php/Main_Page.

3.3 *CETAF*

The Consortium of European Taxonomic Facilities (CETAF) currently provides three constitutive documents at: <http://cetaf.biodiv.naturkundemuseum-berlin.de/documents.php>.

3.4 *EDIT*

More than 500 documents have been produced in the European Distributed Institute of Taxonomy (EDIT) project. They are available from the download centre at: <http://www.e-taxonomy.eu/downloadcenter>. One of the outcomes of the EDIT project is the software index BD-Tracker at: <http://bdtracker.cybertaxonomy.africamuseum.be/>.

3.5 *ENBI*

Most hyperlinks from the European Network for Biodiversity Information (ENBI) at <http://www.enbi.info/forums/ig/repository.php> point to the former GBIF document archive CIRCA, which is not maintained anymore. Also most links listed in the participating projects are broken, although some of them, still maintained, could be used for identifying new possible associated project partners for OpenUp!.

3.6 *European IPR-Helpdesk*

The European IPR Helpdesk at <http://www.ipr-helpdesk.eu/> provides documents, trainings, a glossary and a section for FAQ's on Intellectual Property related issues.

3.7 *Europeana*

On the Europeana v1.0 project documents website at <http://version1.europeana.eu/web/europeana-project/documents> users can browse all available documentation by thematic tabs for material on business and technical documents, as well as presentations and white papers. There are also usage guides for public domain works and a whole section on material on the new Europeana data exchange agreement, which also features a long Q and A section and a summary of the consultation process <http://version1.europeana.eu/web/europeana-project/newagreement-consultation/>.

With Europeana Professional <http://pro.europeana.eu/> a new service has been set up where users can find documentations from other projects related to Europeana. Users have to register to become a member to be able to see the documentations of the projects, but some public outcomes are available without login at <http://pro.europeana.eu/web/guest/projects>. There is also a section dedicated to presentations given at the last Europeana Content Provider and Aggregator meeting 2011, that are not listed on the above mentioned website but can serve as a good entry point to understand the Europeana documentation <http://pro.europeana.eu/ccpa-network-meeting-2011>.

3.8 GBIF

The centralized source of documentation on the Global Biodiversity Information Facility (GBIF) can be found at <http://www.gbif.org/nc/orc/>. The ORC (Online research centre) is the place where all nodes should put their documentation. Users can browse the documentation by thematic areas: start up kit, training resources, tools, and strategic documents.

A set of technical documents can be found at <http://rs.gbif.org/> and an inventory of tools is available at <http://tools.gbif.org/>.

3.9 ICOM

ICOM stands for International Council of Museums. They provide standards and guidelines for various topics concerning museum design, management and collections organisation. The centralized source of information is <http://icom.museum/what-we-do/resources.html>.

3.10 Natural Europe

The Natural Europe project aims at connecting natural history collections with the educational environment. Deliverables are published at: <http://www.natural-europe.eu/en/what-is-natural-europe/outcomes/deliverables>.

3.11 OpenUp!

A full list of components and deliverables that are going to be written in the course of the OpenUp! project can be found in the Annex I - "Description of Work" Part B of the Grant Agreement, pp. 76-82. The public components and deliverable will be made accessible sorted by month of delivery at <http://open-up.eu/content/deliverables-and-components-pu>. Further information on activities of the project and texts about it can be accessed in the "documents" and "news" section.

3.12 STERNA³

Documentation on the STERNA project (Semantic Web-based Thematic European Reference Network Application) can be found on the Sterna project website at <http://www.sterna-net.eu/>.

Documentation on the STERNA project includes information on the architecture and the content enrichment process. Furthermore several use case studies have been published and two annual reports, as well as the final project report, which is available at the Presto Centre website at <http://www.prestocentre.org/library/resources/sterna-evaluation-final-report>.

³ Previously published in OpenUp! C1.5.1 – OpenUp! And the results of the STERNA project, full text at: <http://open-up.eu/sites/open-up.eu/files/u2/OpenUp%21%20C1%205%201%20 final draft co-1.pdf>

The online manual for the RNA Toolset™ at <http://manual.rnatoolset.net> requires a login. Video tutorials on the RNA Toolset are available at <http://vimeo.com/channels/sterna>.

3.13 Species 2000

Documents of the Species 2000 project, which aims to create a validated checklist for the world's species, can be found at http://www.sp2000.org/index.php?option=com_content&task=category§ionid=5&id=25&Itemid=49. Project reports are available at http://www.sp2000.org/index.php?option=com_content&task=category§ionid=5&id=21&Itemid=77 and the Annual Reports at http://www.sp2000.org/index.php?option=com_content&task=section&id=8&Itemid=79.

3.14 TDWG

The centralized source of documentation for TDWG's biodiversity information standards is <http://wiki.tdwg.org/>. The documentation is wiki-based which gives a great overview of the changes made throughout the documentation. A list of TDWG standards can also be seen at <http://www.tdwg.org/standards/>. This page gives a good overview of all the standards maintained by TDWG. It is also good reference point for the status of the standard - draft/current/prior. This component mainly focuses on <http://wiki.tdwg.org/ABCD/> as ABCD is the standard used in OpenUp!.

4 DOCUMENTATION ANALYSIS

The table below gives an idea on how to analyse the data that was collected by identifying the documents (Table 1). It can be re-used and extended, where necessary, in the follow up components. Every spread sheet entry is considered to be a distinct resource in the current component. A more sophisticated solution might be introduced in the follow-up components.

Table 1: Identified existing documentation

Theme	Aspect	Amount
Number of resources		273 ⁴
Number of pages (Where applicable)		5782
Published as		
	PDF	202
	Website	24
	Video	13

	General	14
	BioCAsE Provider Software	13
	Database systems	33
	Data exchange schemas and protocols	14
	Multimedia content	3
Copyright and IPR questions		65

⁴ Due to source duplication the overall final number of documents is 273 instead of the 300+ stated during the 2012 OpenUp! Review Meeting. This issue is not as much of a problem anymore as a formula that checks for duplicate URLs is now in place. Other occurrences of duplicate documents are checked manually as in some cases a webpage that holds the document was specified instead of the actual document.

5 OUTLOOK

The work of identifying documentation has been done by the members of the OpenUp! WP7 who will continue to curate this list over the period of the OpenUp! project.

C7.2.1 is the first in a series of components on documentation. For M14 an analysis of documentation, gaps and plan for needed additional documentation (C7.2.2) will be prepared. Enriched + checked existing documentation in original language will be made available on the website in M16 (D11/C7.2.3). At a later stage of the project, in M32, newly produced documentation will be available on the helpdesk website (D21/C7.2.4). And in the final stage, in M36, the complete documentation of OpenUp! services will be available on the website in different languages (C7.2.5).

Parts of this component have already been cited in C1.5.1 *OpenUp! and the results of the STERNA project*⁵ and C7.1.4 *Guidelines for users and content providers v. 1*⁶, and published on the OpenUp! Helpdesk⁷. The authors hope that the work done in this component supports further developments in the biodiversity information and digital library domains.

6 ANNEX

Disclaimer: Although the information in this document and annex has been carefully selected, OpenUp! and the authors cannot guarantee the accuracy or completeness of the information. Also some provided information may lose its accuracy over time, for example hyperlinks that no longer lead to the indicated document.

The list in this annex shows the identified documentation. An online version is accessible in Google: <https://docs.google.com/spreadsheet/ccc?key=0A0lrOUcsTAbidGVma0tTLWZBVEZqZWRIUU1NTDIIIE>

It further explains where these rules may be found and the terminology commonly used." [Taken from the document.]	June 2011	n.a.	21.02.12	Copyright and IPR questions;	English	PDF	6	http://www.iprhelpdesk.eu/sites/default/files/relateddocuments/Factsheet%20IP%20rules%20FP7%20June%202011.pdf
IP issues in brokerage events	Anonymous	European IPR-Helpdesk	European IPR-Helpdesk	European Commission	"The purpose of this fact sheet is to provide an overview of the main IP issues that should be considered when participating in a brokerage event. Being aware of the risks is part of a thorough preparation, which is essential for a successful participation in these events. Yet, to successfully build up a business relationship and start a partnership will also depend on what happens after the brokerage event, since it is unlikely that any agreement participants would be willing to conclude will be signed at these events. Follow up is therefore essential. Our suggestion is to be aware of IP, be prepared and keep motivated. The brokerage event is just one of the many steps for a successful business partnership!" Creative Commons global network	Anonymous	Creative commons	n.a.	Unknown	The idea of universal access to research, education, and culture is made possible by the Internet, but our legal and social systems don't always allow that idea to be realized. Copyright was created long before the emergence of the Internet, and can make it hard to legally perform actions we take for granted on the network: copy, paste, edit source, and post to the Web. The default setting of copyright law requires all of these actions to have explicit permission, granted in advance, whether you're an artist, teacher, scientist, librarian, policymaker, or just a regular user. To achieve the vision of universal access, someone needed to provide a free, public, and standardized infrastructure that creates a balance between the reality of the Internet and the reality of copyright laws. That someone is Creative Commons.	n.a.	n.a.	05.03.12	Copyright and IPR questions;	English	website	n.a.	http://creativecommons.org/

Creative Commons licenses and the non-commercial condition: Implications for the re-use of biodiversity information	Hagedorn, Gregor; Mietchen, Daniel; Morris, Robert A.; Agosti, Donat; Penev, Lyubomir; Berendsohn, Walter G.; Hobern, Donald	Julius Kühn-Institute, Federal Research Centre for Cultivated Plants, Germany; EvoMRI Communications; Open Knowledge Foundation Deutschland; Germany, and Pensoft Publishers; Harvard University Herbaria and University of Massachusetts at Boston; Plazi; Bulgarian Academy of Sciences & Pensoft Publishers; Botanischer Garten und Botanisches	n.a.	Unknown	"The Creative Commons (CC) licenses are a suite of copyright-based licenses defining terms for the distribution and re-use of creative works. CC provides licenses for different use cases and includes open content licenses such as the Attribution license (CC BY, used by many Open Access scientific publishers) and the Attribution Share Alike license (CC BY-SA, used by Wikipedia, for example). However, the license suite also contains non-free and non-open licenses like those containing a "non-commercial" (NC) condition. Although many people identify "non-commercial" with "non-profit", detailed analysis reveals that significant differences exist and that the license may impose some unexpected re-use limitations on works thus licensed. After providing background information on the concepts of Creative Commons licenses in general, this contribution focuses on the NC condition, its advantages, disadvantages and appropriate scope. Specifically, it contributes material towards a risk analysis for potential re-users of NC-licensed works." [Taken from the document.]	28 November 2011	n.a.	05.03.12	Copyright and IPR questions;	English	Website	n.a.	http://www.pensoft.net/journals/zookeys/article/2189/creative-commons-licenses-and-the-non-commercial-condition-implications-for-the-re-use-of-biodiversity-information

The Problem of the Yellow Milkmaid : A Business Model Perspective on Open Metadata (Europeana White Paper No. 2)	Harry Verwayen; Martijn Arnoldus; Kennisland; Peter B. Kaufman	Europeana	Europeana v1.0	Co-funded by the European Union	"Interest in open metadata is growing among policy makers, the cultural heritage sector, the research community, and software and application developers. At the European level, the Digital Agenda for Europe 2020 identifies 'opening up public data resources for re-use' as a key action in support of the Digital Single Market. 2 The European Commission is reviewing the Directive on Re-Use of Public Sector Information. The Commission's The New Renaissance report 3, published in January 2011, emphatically endorsed open data. At the national level, for example in the UK, the higher education community has issued the Open Metadata Principles 4 calling on metadata to be openly available for innovative re-use." BHL-Europe Newsletter #1	Collective	n.a.	BHL-Europe	European Commission	"For dissemination of the idea we have launched the BHL-Europe Newsletter, providing more detailed information about the project and associated activities. These are largely digitizing activities centered on taxonomical literature and biodiversity. The main purpose of the newsletter is to provide up-to-date information about the project and new project outcomes, meetings and other information which could be helpful to a variety of users. Additionally, we will also publish news about other projects and initiatives dealing with digitalization and biodiversity. We look forward to the work and hope to provide you with useful information focused on digitalization and biodiversity." [Taken from the document.]	August 2009	n.a.	05.03.12	Projects and Networks > BHL-Europe	English	PDF	28	http://www.bhl-europe.eu/en/webfm_send/57
BHL-Europe Newsletter #10	Collective	n.a.	BHL-Europe	European Commission	"Conferences dominate our calendar every autumn. In 2011 we attended a number of large and important conferences that are featured with articles in this newsletter. During the Life and Literature conference in Chicago we promoted the Biodiversity Library Exhibition and got a lot of positive feedback and encouragement to sustain it and develop it further. The BHL-Europe business model was well received during the DISH conference in Rotterdam. BHL-Europe also managed to promote the project during the CCPA plenary meeting." BHL-Europe Newsletter #3	Collective	n.a.	BHL-Europe	European Commission	"This third issue of the BHL-Europe Newsletter continues to provide information on digitization work already undertaken by our partner libraries, as well as progress notices on the BHL - Europe project. At the same time this newsletter is posted up, Europeana are preparing a major release of content, details of which unfortunately can only be mentioned briefly here. The content release is known as the "Rhine" and it will double the current content of Europeana to over 10 million items drawn from Europe's cultural and scientific heritage." [Taken from the document.]	March 2010	n.a.	05.03.12	Projects and Networks > BHL-Europe	English	PDF	15	http://www.bhl-europe.eu/en/webform_send/50
BHL-Europe Newsletter #4	Collective	n.a.	BHL-Europe	European Commission	"This newsletter of BHL-Europe contains the first annual report of the project. Since May 2009, 28 partners are working together to make available Europe's biodiversity information to available everyone by improving the interoperability of European biodiversity digital libraries. BHL-Europe is a Best Practice Network, co-funded by the European Commission under the eContentplus programme, as part of the i2010 policy." [Taken from the document.]	4 May 2010	n.a.	05.03.12	Projects and Networks > BHL-Europe	English	PDF	20	http://www.bhl-europe.eu/en/webform_send/79
BHL-Europe Newsletter #5/6	Collective	n.a.	BHL-Europe	European Commission	"With the end of this reporting period and the end of the first half of the project, we now have prototype solutions for all three access points mentioned above. More than 300,000 library records are available in GRIB. The German Prototype is available giving access to three collections. These collections are also available through Europeana. The work on the final BHL-Europe system is progressing well. The architecture is now defined. The hardware is configured and first content is already copied to the system in London. The identification of the use cases for this system will be finished soon taking into account the results of the first large scale user evaluation in spring 2010." BHL-Europe Newsletter #7	Collective	n.a.	BHL-Europe	European Commission	"The articles in Newsletter No. 7 of BHL-Europe cover a large variety of topics. The last months have seen the start of important new projects, i.e. OpenUp! and the Field Book Project. In February 2011 the close of the EDIT project was celebrated with a final symposium in Paris. Some of the EDIT success stories are described in this newsletter. In February 2011, the BioSystematics conference brought hundreds of evolutionary biologists and systematists to Berlin. The BHL-Europe contribution to this conference is featured below." [Taken from the document.]	April 2011	n.a.	05.03.12	Projects and Networks > BHL-Europe	English	PDF	19	http://www.bhl-europe.eu/en/webform_send/112
BHL-Europe Newsletter #8	Collective	n.a.	BHL-Europe	European Commission	"With this report we would like to inform our target users mainly about the project objectives, the major achievements of the second year and the past and future activities of the project." [Taken from the document.]	June 2011	n.a.	05.03.12	Projects and Networks > BHL-Europe	English	PDF	24	http://www.bhl-europe.eu/en/webform_send/127
BHL-Europe Newsletter #9	Collective	n.a.	BHL-Europe	European Commission	"BHL-Europe is now in the final project year. We successfully passed the second annual review meeting and received a green flag from the European Commission. We can now proceed to focus on the project objectives. Parallel to the work on the different access points to digital biodiversity literature (GRIB, BHL-Europe Portal, Europeana) we now also intensify our efforts to keep BHL-Europe operational after the end of the project. This also includes the investigation of ideas for new projects. With OpenUp! and Natural Europe, two ICT-PSP projects joined the group of biodiversity related projects this year. We will follow their progress and also investigate the collaboration potential. This BHL-Europe newsletter features the OpenUp! project with a dedicated article." BHL-Europe System Description for the German Prototyp (D3.6)	AIT	AIT	BHL-Europe	European Commission	"The purpose of the BHL-Europe German prototype is to establish a metadata platform for the discovery and diffusion of biodiversity heritage literature. The prototype addresses problems of interactivity between different systems, which are mainly caused by varying methods of metadata description. Existing software tools are used to map fields from each database onto a project-defined standard format. The aggregation platform Dismarc MetaDataManager (MDM) serves as a basis for the prototype development." C3.2.1 Contribution to the Global Name Architecture (GBIF/ECAT white paper)	Anonymous	5 UvA	EDIT	European Commission / Sixth Framework Programme	"The GBIF Strategic Plan calls for the creation of a federated ECAT 'catalogue' implying a dedicated and discreet centrally available electronic list of names applied to the organisms of the Earth. Significant proportions of these names remain unavailable to the GBIF network yet and must be made available via a distributed provider network. Since ECAT resources are limited, to establish global and regional capacity, context and value, the decentralized GBIF network requires a close collaboration with other (global and regional) biodiversity initiatives. The ECAT-supported infrastructure that facilitates the inventorying, maintenance, creation, integration, and serving of taxonomic resources for regional and global access is not only mobilized within the GBIF Nodes, but also available through liaison with regional (e.g. EC or NSF funded) programs." [Taken from the document.]	Month 25	1	06.03.12	Projects and Networks > EDIT	English	PDF	8	http://www.e-taxonomy.eu/files/Contribution_to_the_Global_Name_Architecture_(GBIF_ECAT_white_paper).pdf
C4.3.1 Summary conclusions of symposium with what the participants envision as the roadmap" for the immediate future of taxonomic research"	Anonymous	4 CSIC - MNCN	EDIT	European Commission / Sixth Framework Programme	"Understanding the origin and diversity of the living world is a cumbersome endeavour that requires a revision of traditional taxonomic practices. However, it is widely recognized that progress in the study of biodiversity in this time of crisis is hindered by a worldwide shortage of taxonomists coupled with a lack of enough funding for taxonomic study (the "Taxonomic impediment"). To overcome this impediment, it is mandatory both to adopt new technologies developed in other fields for taxonomic use, and to address the key conceptual challenges that taxonomy faces. Under the auspices of EDIT (European Distributed Institute of Taxonomy), 25 European scientists actively publishing in taxonomy, 90 EDIT members, 17 non-EDIT CETAF (Consortium of European Taxonomic Facilities) members, and 15 speakers were invited to gather in a 3-day symposium to discuss in depth future trends of taxonomy." D.5. PR and Communication Plan (Full)	Simon J. Mayo	RBGK; MNHN	EDIT	European Commission / Sixth Framework Programme	"EDIT's Communication Plan needs to demonstrate that networked, integrated taxonomic resources (human and institutional) as exemplified by EDIT, can overcome the Taxonomic Impediment and greatly improve the delivery and performance of modern taxonomic science in tackling key regional and global problems in biodiversity science and conservation. Separate audiences will require separate messages. The Communication Plan should 1) promote taxonomy and key achievements of taxonomic science for the general public; 2) influence decision-makers, especially in European Union, with a view to increasing future funding prospects for taxonomic science; 3) reinforce the sense of common purpose within the EDIT taxonomic community and beyond." [Taken from the document.]	Month 23	[Final]	06.03.12	Projects and Networks > EDIT	English	PDF	9	http://www.e-taxonomy.eu/files/D5-Communications_Plan_Final_28_Feb08Full.pdf
D1 AND D2 EDIT INTEGRATION PROCESS AND ROADMAP 2008-2011	Anonymous	MNHN	EDIT	European Commission / Sixth Framework Programme	"By the beginning of 2008, the process toward durable integration of EDIT member taxonomic institutions is informed: - in scientific terms, by the report of the EDIT Future Scoping Group (FSG) as presented and endorsed by the Board of Directors at their 4 th meeting in January 2008; - in institutional terms, by the reflection led in parallel by the Network Steering Committee and the Board of Directors, both agreeing that the scientific vision can not be implemented without improved coordination and, whenever possible, integration formalized through multilateral agreements between taxonomic institutions and possibly through a new overarching legal structure whose missions would be delimited through the principle of subsidiarity." D19 INTEGRATED SUSTAINABLE ADMINISTRATIVE AND MANAGERIAL STRUCTURE OF EDIT	Anonymous	MNHN	EDIT	European Commission / Sixth Framework Programme	"By the end of the EDIT contract, the consortium's preferred option for a sustained managerial integrative structure is to integrate EDIT activities into a renovated CETAF (Consortium of European Taxonomic Facilities), which will establish a permanent secretariat to maintain, coordinate and develop integrated activities. CETAF decision will be made at its next meeting in April. If the CETAF could not implement the plan elaborated jointly by EDIT and the CETAF Executive Committee as summarized further, the option will be to continue with a more restricted consortium, focused on the largest European Taxonomic Institutions but still opened to partners willing to join." [Taken from the document.]	Month 59	n.a.	06.03.12	Projects and Networks > EDIT	English	PDF	17	http://www.e-taxonomy.eu/files/D19_Integrated_sustainable_administrative_&_managerial_structure_EDIT_Final_0.pdf
D1D2 - Update 2009 Annex 4 EDIT beyond 2011: an Institutional Vision	Bertrand Galey	MNHN	EDIT	European Commission / Sixth Framework Programme	"Based on an original workshop (10 Jan. 2008, MNHN). Participants: Bertrand Galey (MNHN, Paris), Wouter Los (UvA, Amsterdam), Reinhold Leinfelder (Humboldt Museum, Berlin), Myriam Nechad (MNHN, Paris), Eimear NicLughada (RBG, Kew), Camille Pisani (RBINS, Brussels), Sybille Van den Hove (EDIT SAC chair), Simon Tillier (EDIT project leader)" [Taken from the document.]	n.a.	n.a.	06.03.12	Projects and Networks > EDIT	English	PDF	3	http://www.e-taxonomy.eu/files/D1D2_2009_Annex_4_beyond_2011%20An_institutional_vision.pdf
D2.1.1 Report on existing relevant directories	Anonymous	Partner 3, UKBH	EDIT	European Commission / Sixth Framework Programme	"Taken together, European taxonomists constitute a potentially extremely powerful workforce to deal with the challenges identified by EDIT. However, the European expertise is currently badly fragmented by taxa (e.g. botanists / zoologists, entomologists / other zoologists, etc.), by countries, by institutions, and by status of the experts (professional / amateurs), resulting in a suboptimal use of both human and financial resources: the rate of experts per taxon is extremely uneven, and needs for expertise have overall little effect on recruitment strategies because we have no overview of the existing spectrum of taxonomic expertise at the European level." [Taken from the document.]	Month 18	[Final]	06.03.12	Projects and Networks > EDIT	English	PDF	13	http://www.e-taxonomy.eu/files/WP2_D2-1-1_report_Final.pdf
D2.5 First version of the online information structure on societies and networks	Anonymous	19 - CUB	EDIT	European Commission / Sixth Framework Programme	"Prototype of the online search service of taxonomic societies was compiled, tested and published at http://zoology.fns.uniba.sk/edit " [Taken from the document.]	February 2007	[draft]	06.03.12	Projects and Networks > EDIT	English	PDF	2	http://www.e-taxonomy.eu/files/d25_database_societies.pdf

D23 – Operational Pilot Information Service on European Taxonomic Workforce	Anonymous	9 FUB-BGBM	EDIT	European Commission / Sixth Framework Programme	"WP2 made the EditExpertNet database available for public online access in May 2009. The database is presently located at www.EditExpertNet.org . The objective of the database is to provide an efficient online information service on European Taxonomic experts, their expertise and ongoing and planned taxonomic research projects. It provides searchable information on the taxonomists' expertise down to family level, their research activities, methods used and geographical and environmental distribution of research organisms. At present, the scope of the taxonomic expertise covers fungi, plants and animals. In addition to providing information on the main institutional affinity of the expert, the database also lists taxonomic societies and networks in which the taxonomist participates. Furthermore, it is possible to conduct a search for experts by articles, presentations or published news." [Taken from the document.]	Month 49	1	06.03.12	Projects and Networks > EDIT	English	PDF	5	http://www.e-taxonomy.eu/files/D23_Operational_Pilot_Information_Service_on_European_Taxonomic_Workforce.pdf
D25 Report on ways to stimulate and coordinate collaborative research	Anonymous	2 - MNHM	EDIT	European Commission / Sixth Framework Programme	"EDIT WP4 was planned to build upon the vision proposed for taxonomy expressed in the original grant proposal, to elaborate a common science policy and develop a joint research strategy to adapt to changing demands on taxonomic science from biodiversity, ecosystem research, and other stakeholders and users. Its core objective was to integrate current research activities and explore emerging areas for taxonomic research for EDIT, to promote synergies among research efforts within EDIT and beyond."	Month 59	Final	06.03.12	Projects and Networks > EDIT	English	PDF	23	http://www.e-taxonomy.eu/files/D25_CollabResearch_Final.pdf
D26 Report on revisionary taxonomic products	Anonymous	10 - NHML	EDIT	European Commission / Sixth Framework Programme	"In response to EDIT's objective of improving the dissemination of taxonomic information and reducing its fragmentation, the palm exemplar group of WP6 set out to create Palmweb (www.palmweb.org), an online resource for palm taxonomy and biodiversity." [Taken from the document.]	Month 59	Final	06.03.12	Projects and Networks > EDIT	English	PDF	5	http://www.e-taxonomy.eu/files/D26_Report_on_revisionary_taxonomic_products.pdf
D27 Progress report on Integrated Training for Taxonomy	Anonymous	13-RBINS	EDIT	European Commission / Sixth Framework Programme	"In training, the objective is to consolidate a high quality training that prepares students for future taxonomic careers. EDIT and other international partners established a European state-of the art School of Taxonomy: the Distributed European School of Taxonomy (DEST). Several EDIT partners and other partners invest in delivering training courses. EDIT contracts staff, develops training activities, and monitors the overall functioning of the DEST." The Europeana Data Model for Cultural Heritage What is the issue ? How does EDM contribute to the Web of Data or Semantic	Anonymous	Europeana	Europeana v1.0	Co-funded by the European Union	"A vast number of Europe's cultural heritage objects are digitised by a wide range of data providers from the library, museum, archive and audiovisual sectors, and they all use different metadata standards. This data needs to appear in a meaningful way in a crosscultural, multilingual context such as Europeana. Numerous cultural heritage resources such as thesauri exist worldwide and have the potential to add valuable content at low cost when re-used. Duplication of effort, however, needs to be avoided. The Linked Open Data environment lacks authoritative data from the cultural heritage community to contribute to the development of new knowledge." [Taken from the document].	n.a.	n.a.	21.02.12	Projects and Networks > Europeana;	English	PDF	2	http://version1.europeana.eu/c/document_library/get_file?uuid=ef2baffc-f078-41d9-be5f-76a3427f198f&groupId=51031
data.europeana.eu-The Europeana Linked Open Data Pilot	Haslhofer, Bernhard; Isaac, Antoine	University of Vienna; Vrije Universiteit Amsterdam	Europeana v1.0	Co-funded by the European Union	"data.europeana.eu is an ongoing effort of making Europeana metadata available as Linked Open Data on the Web. It allows others to access metadata collected from Europeana data providers via standard Web technologies. The data are represented in the Europeana Data Model (EDM) and the described resources are addressable and dereferencable by their URIs. Links between Europeana resources and other resources in the Linked Data Web will enable the discovery of semantically related resources. We developed an approach that allows Europeana data providers to opt for their data to become Linked Data and converts their metadata to EDM, benefiting from Europeana efforts to link them to semantically related resources on the Web. With that approach, we produced a first Linked Data version of Europeana and published the resulting datasets on the Web. We also gained experiences with respect to EDM, HTTP URI design, and RDF store performance and report them in this paper." Guidelines for the europeana:rights metadata element	Maarten Zeinstra; Paul Keller; Patrick Peiffer; et. al	n.a.	European a v1.0	Co-funded by the European Union	"The Europeana Data Provider and Data Aggregator agreements require that data providers apply a statement about the rights status of the digital objects described in the metadata submitted to Europeana. The europeana:rights element has been included in ESE 3.3 for this purpose. This document gives more information on how to provide such a rights statement. It deals solely with the rights in relation to the digital object because the rights relating to the metadata are dealt with in the Data Provider agreement. For users of Europeana, the rights statement given for the object also applies to the small images (thumbnails and previews) used in the portal." D2.1 – White paper on Natural Europe Vision	Palavitsinis, Nikos; Tsiflidou, Effie; Manouselis, Nikos & Tsilibaris, Xenofontas	GRNET	Natural Europe	European Commission	"This deliverable documents the process and ongoing results for the establishment of a joint vision on what Natural Europe is trying to achieve (objectives, scope, stakeholders and expected outcomes). In its initial version it reflects the outcomes of the interactive session on "the ideal project" that has been organized with the participation of all the partners during the Kick-Off Meeting in October 2010. During the project's lifetime, this White Paper will serve as a living document that will be periodically revisited and revised, recording the outcomes of similar interactive sessions to take place during project meetings as well as other ways in which the project vision is affected/shaped. Overall, will try to document the evolution of the Natural Europe vision and the foreseen outcomes under the objectives set forth by the project." An Architecture for Networked Collections : Overview of the RNA Architecture	Nederbragt, Hans	Trezorix	STERNA	European Commission	"RNA, short for Reference Network Architecture, is a web--based information architecture that facilitates an easy way of connecting various knowledge resources on the internet and that provides an accessible and unambiguous way of retrieving the heterogeneous content within those resources. The RNA architecture is based on semantic web standards, in particular RDF and SKOS. In this document the various aspects with respect to building an intricate web of heterogeneous, dispersed but semantically connected content with the RNA architecture, such as the purposes of reference structures, multi modelling and the RNA environment, are explained in detail." The Biodiversity Heritage Library : Advancing Metadata Practices in a Collaborative Digital Library	Pilsik, Suzanne C; Person, Matthew A; Deveer, Joseph M & Kalfatovic, Martin R	Smithsonian Institution Libraries; MBLWHOI Library; Ernst Mayr Library; MBLWHOI Library	n.a.	Unknown	"This article examines the needs of users of taxonomic literature, specifically in relation to the transformation of traditional library material to digital form. It details the issues that arise in determining scanning priorities, avoiding duplication of scanning across the founding 12 natural history and botanical garden library collections, and the problems related to the complexity of serials, monographs, and series. Highlighted are the tools, procedures, and methodology for addressing the details of a mass-scanning operation. Specifically, keeping a steady flow of material, creation of page level metadata, and building services on top of data and metadata that meet the needs of the targeted communities." A view on collection databasing Notas para el taller de Fichado de datos para técnicos de colecciones de historia natural (Junio 2009)	Francisco Pando	GBIF Spain	GBIF Spain	Spanish High Council of Research (CSIC)	This presentation was delivered as a part of the "2nd GBIF Data Recording for technicians in Natural History Collections ". Collection databasing is expensive and laborious, and their results are only visible in the long term. It is for that reason that such a task should be tackled from the perspective of the utility. When planning the computerization of a collection, is necessary to consider carefully the objectives and how the database is going to fulfill them. Doing otherwise is throwing away time and money.	9-06-2009	n.a.	06.03.12	Technical questions > Database systems;	Spanish	Video	n.a.	http://www.gbif.es/videos/video_detalle.php?IDVideo=53

A Beginner's Guide to Persistent Identifiers	Richards, K., White, R., Nicolson, N. & Pyle, R.	GBIF	GBIF	GBIF's Voting Participants	"The guide covers the practice of issuing and maintaining Persistent Identifiers for primary biodiversity data from a beginner's perspective. It also includes information explaining the costs and benefits of implementing Persistent Identifiers. It was commissioned by the GBIF Secretariat in response to the recommendations of the LSID GUID Task Group, convened with the objective to explore the issues and offer recommendations on the way forward that will enable GBIF to provide architecture leadership and best practices for the implementation of Persistent Identifiers." [Taken from the document.]	02.2011	1.0	06.03.12	Technical questions > Database systems; Projects and Networks > GBIF	English	PDF	33	http://links.gbif.org/persistent_identifiers_guide_en_v1.pdf
Adoption of Persistent Identifiers for Biodiversity Informatics	Cryer, Phil; Roger Hyam, Chuck Miller, Nicola Nicolson, Éamonn Ó Tuama, Rod Page, Jonathan Rees, Greg Riccardi, Kevin Richards, and Richard White	GBIF	GBIF	GBIF's Voting Participants	"This report contains recommendations about the adoption of Persistent Identifiers in the Biodiversity Informatics realm. It is authored by the members of the LSID GUID Task Group commissioned by GBIF in 2009." [Taken from the document].	11.2009	1.1	06.03.12	Technical questions > Database systems; Projects and Networks > GBIF	English	PDF	23	http://imgsbif.gbif.org/CMS_ORC/?doc_id=2956&download=1
GBIF Training Manual 1: Digitisation of Natural History Collections Data	Chapman, A.D., Franzier, C.K., Grafton, O., Grant, S., Hobern, D., Lane, M., Wall, J. & Wieczorek, J.	GBIF	GBIF	GBIF's Voting Participants	"A complete package of background information and guidance for the curators and managers of natural history collections and herbaria."
